DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on July 29, 2009 has been entered.

Election/Restrictions

This application is in condition for allowance except for the presence of claims
 11-20 that are directed to an invention non-elected without traverse. Accordingly,
 claims 11-20 have been cancelled.

EXAMINER'S AMENDMENT

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Michael Caridi on November 13, 2009.

The application has been amended as follows:

Claim 1 (currently amended): A substrate having an organic thin film, characterized in that: a buffer layer and the organic thin film are sequentially deposited on a substrate so that the organic thin film overlies the buffer layer,

wherein said substrate is an insulating substrate, said buffer layer consisting essentially of either pentacene or pentacene fluoride; said organic thin film is either C_n fullerence fullerene, [[(]]wherein n is an integer of 60 or more[[)]], or rubrene; and said organic thin film is a two dimensional film.

Claim 6 (currently amended): A transistor provided with an organic thin film formed on a substrate, characterized in that: said organic thin film is deposited on said substrate via a buffer layer, and orienting said organic thin film flatly;

wherein said substrate is an insulating substrate, said buffer layer consisting essentially of either pentacene or pentacene fluoride; wherein the organic thin film overlies the buffer layer; said organic thin film is either C_n fullerene, [[(]]wherein n is an integer of 60 or more[[)]], or rubrene; and said organic thin film is a two dimensional film.

Claims 11-20 (cancelled).

Claim 22 (currently amended): A substrate having an organic thin film, characterized in that: a buffer layer and the organic thin film are sequentially deposited

on a substrate so that the organic thin film overlies the buffer layer; said buffer layer consists essentially of either pentacene or pentacene fluoride, said organic thin film is either C_n fullerene, [[(]]where<u>in</u> n is an integer of 60 or more[[)]], or rubrene, said buffer layer orients said organic thin film flatly, and said organic thin film is a two dimensional film.

Claim 24 (currently amended): A transistor, characterized in that: it is a transistor having an organic thin film formed on substrate, said organic thin film is deposited on said substrate via a buffer layer consisting essentially of either pentacene or pentacene fluoride, said buffer layer orienting the organic thin film flatly, and said organic thin film is either C_n fullerene, [[(]]wherein n is an integer of 60 or more[[)]], or rubrene, wherein the organic thin film overlies the buffer layer, and said organic thin film is a two dimensional film.

Allowable Subject Matter

- 4. Claims 1, 2, 4-7, 9, 10, and 21-24 are allowed.
- 5. The following is an examiner's statement of reasons for allowance: The prior arts of record do not disclose or suggest at least the limitation of "a substrate having an organic thin film, wherein said substrate is an insulating substrate, said buffer layer consisting essentially of either pentacene or pentacene fluoride; said organic thin film is either C_n fullerene, wherein n is an integer of 60 or more, or rubrene and said organic thin film is a two dimensional film" as recited in claim 1, "a transistor provided with an

organic thin film formed on a substrate, wherein said substrate is an insulating substrate, said buffer layer consisting essentially of either pentacene or pentacene fluoride; wherein the organic tin film overlies the buffer layer; said organic thin film is either C_n fullerene, wherein n is an integer of 60 or more, or rubrene; and said organic thin film is a two dimensional film" as recited in claim 6, "a substrate having an organic thin film, said buffer layer consists essentially of either pentacene or pentacene fluoride, said buffer layer orients said organic thin film flatly, and said organic thin film is a two dimensional film" as recited in claim 21, "a substrate having an organic thin film, said buffer layer consists essentially of either pentacene or pentacene fluoride, said organic thin film is either C_n fullerene, where n is an integer of 60 or more, or rubrene, said buffer layer orients said organic thin film flatly, and said organic thin film is a two dimensional film" as recited in claim 22, "a transistor, said organic thin film is deposited on said substrate via a buffer layer consisting essentially of either pentacene or pentacene fluoride, said buffer layer orienting the organic thin film flatly, wherein the organic thin film overlies the buffer layer, and said organic thin film is a two dimensional film" as recited in claim 23, and "a transistor, said organic thin film is deposited on said substrate via a buffer layer consisting essentially of either pentacene or pentacene fluoride, said buffer layer orienting the organic thin film flatly, and said organic thin film is either C_n fullerene, where n is an integer of 60 or more, or rubrene, wherein the organic thin film overlies the buffer layer, and said organic thin film is a two dimensional film" as recited in claim 24.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
